"All individuals have the RIGHT and the ABILITY to continue to learn."

INDIVIDUALIZED PROGRAMMING

While our program works as a whole to promote greater independence in and outside of the community, HBIC-ADP recognizes that all individuals learn differently and have different needs. With our highly qualified staff we are able to offer a dynamic support program. Daily activities and lessons are based on person-centered planning, and directed towards creating an overall improved quality of life.

POSITIVE BEHAVIOR SUPPORT

HBIC's Adult Day Program focuses on alleviating the underlying cause of behavior by understanding what *needs are being met* by engaging in the behavior(s). Emphasis is placed on teaching clients self-regulation and more appropriate, positive ways to meet those same needs. We understand that negative behaviors will occur, at which time we utilize appropriate, safe and positive approaches of response.

COMMUNITY INTEGRATION and LIFE-LONG LEARNING

We understand that meaningful relationships, community integration, independence training, vocational training/job placement and practical reading, math and technology awareness are keys to ensuring success for our clients. Through education and exposure, HBIC's Adult Day Program has built strong collaborations with numerous local businesses to help provide various opportunities including volunteer work, pre-vocational activities and job placement. No matter the experience, focus is always placed on positive interaction and the client's right to be a contributing citizen.

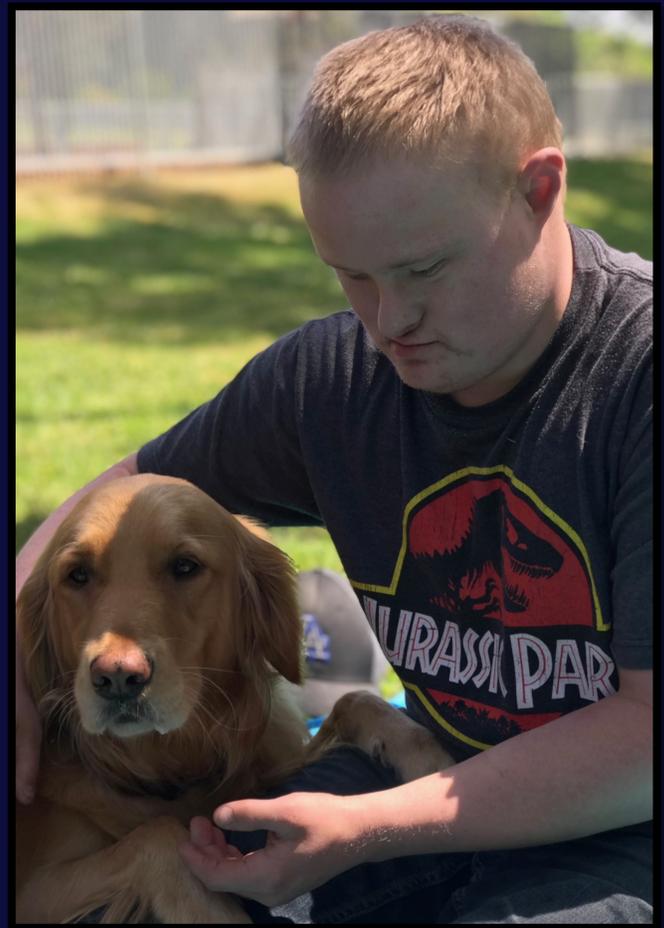

"All individuals have the RIGHT and the ABILITY to continue to learn."

At HBIC's Adult Day Program, located at the "Emily's Place" site in Whittier, CA, we know the significance of quality services. To ensure that we make a positive impact, our staff dedicate their time to building a rapport with each and every client that comes through our doors. We take the time to learn about their individual personality and interests, who is in their life, their medical concerns or needs, behavior management needs, and what their specific learning style is. To make sure our program is efficient and effective as possible, each client has an Individual Service Plan (ISP) that targets both area of *need* and area of *interest*, and is based on the concept of Person-Centered Planning. It is important that we make each and every moment with our clients an enriching opportunity to promote greater independence.

Whether it is greeting the clients personally at the door, communicating with them in their preferred method of communication, or maintaining a balance of continuing education and physical activity, we are there to support them. It is important to us that each of our clients know that they matter, that they are appreciated, and that someone understands and is there for them.

We encourage you to visit HBIC's Adult Day Program at Emily's Place to see what we can do for your loved one, so we can begin to make a positive difference in their overall quality of life.

"All individuals have the RIGHT and the ABILITY to learn."
